

Abhishek Bhat P

Mangalore, Karnataka, India

Passionate about Innovation, Problem-Solving and Learning

+91-7795689009 — abhishekbhatp0418@gmail.com — LinkedIn — GitHub

Education

Sahyadri College of Engineering and Management
Bachelor of Engineering in Computer Science (CGPA: 8.8)

Sept 2023 – June 2027

Technical Skills

Programming Languages: Python, Java, C++, C, HTML, CSS

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook, Google Colab, MS Excel

Database: MySQL

Projects

Arecanut Disease Detection and Fertilizer Recommendation System

Developed a machine learning–based system to detect arecanut plant diseases from leaf images and recommend suitable fertilizers.

- Built a disease detection model using image processing and machine learning techniques to classify arecanut leaf diseases.
- Used Python, TensorFlow, Keras, and OpenCV to preprocess arecanut leaf images and train and evaluate a MobileNetV2-based deep learning model on a labeled dataset for disease classification.
- Implemented image preprocessing steps such as resizing, normalization, and noise reduction to improve classification accuracy.
- Designed a fertilizer recommendation module that suggests appropriate fertilizers based on detected disease and crop condition.

PM Internship Bot (Chatbot Automation)

- Developed a rule-based chatbot using Python to handle queries related to internship eligibility, application process, deadlines, benefits, and other scheme-related information.
- Designed conversational intents and response mapping to provide structured, consistent, and user-friendly responses to frequently asked student queries.
- Integrated the chatbot with a web-based interface using HTML, CSS, and JavaScript, enabling students to access internship information through an interactive interface.
- Automated the information-search process, reducing the time and effort required for students to find relevant internship information from multiple sources.

Internship

Infosys Springboard Internship 6.0 – ClimateScope

Feb 2026 – Apr 2026

Visualizing Global Weather Trends and Extreme Events

- Developed an interactive weather analytics dashboard to visualize global weather trends and extreme events.
- Performed data preprocessing, exploratory data analysis (EDA), and interactive visualization using Python.
- Built dashboards using Streamlit, Plotly, Pandas, and Matplotlib to analyze temperature, humidity, rainfall, and climate patterns.
- Successfully completed the mandatory internship assignment under Infosys Springboard Internship 6.0.

Achievements

Second Place — VERSATHON 1.0 Hackathon (2026)

Secured 2nd place among 25+ teams in the VERSATHON 1.0 Hackathon for developing an innovative solution and showcasing strong problem-solving and teamwork skills.

Elite Certification — NPTEL Python for Data Science (2026)

Earned an Elite certificate from NPTEL with a consolidated score of 72%, demonstrating proficiency in Python programming, data analysis, and data science fundamentals.
